

Fraunhofer IAO: technology and patent monitoring of Chinese Industry 4.0 inventions

<http://s.fhg.de/china-industry-40>

“Chinese researchers have patented important inventions in the fields of wireless sensor networks, embedded systems, low-cost robots and big data, indicating that China will be leading the pack when it comes to production data in the future.”

- 1700 Chinese patent documents on Industry 4.0 technologies*
- 50 profiles of selected Chinese patent documents with manual translation
- 60 potential Chinese clients for Industry 4.0 solutions

*M2M communication, cloud platform, big data, data security, encryption, embedded system, smart sensor, industrial robots, etc.
